

YEHOR VASYLIEV

Student Developer | Aspiring Quant Developer

Poznań, Poland

GitHub: <https://github.com/biskecz>

Portfolio: <https://biskecz.github.io/portfolio-website/>

PROFILE

First-year programming student interested in quantitative finance, financial markets, and data-driven problem solving. Currently developing financial analysis and systematic trading projects in Python while independently studying mathematics and quantitative methods. Aspiring to pursue a career in quantitative development.

EDUCATION

Zespół Szkół Ekonomicznych im. Stanisława Staszica w Poznaniu

Technik Programista | 2026–2031

Five-year technical secondary school programme focused on programming and IT.

TECHNICAL SKILLS

Programming: Python — Intermediate · C++ — Beginner

Data Analysis: NumPy · pandas · Matplotlib · yfinance

Tools: Git · GitHub

MATHEMATICS & QUANTITATIVE SKILLS

Algebra · Linear Algebra · Probability · Statistical Analysis · Financial Data Analysis · Quantitative Strategy Analysis

Linear Algebra and Probability studied independently.

PROJECTS

SMA Backtester

Python · NumPy · pandas · Matplotlib

Built a backtesting tool for comparing an SMA crossover strategy with a Buy & Hold benchmark. Implemented configurable rolling windows, trading signals, returns, drawdowns, and performance visualisation.

GitHub: <https://github.com/biskecz/Sma-backtester>

Quant Market Data Analytics

Python · NumPy · pandas · Matplotlib · yfinance

Developing a market data analysis tool for AAPL, MSFT, NVDA, and SPY. Analyses returns, volatility, drawdowns, covariance, and correlation, with SPY used as a market benchmark.

GitHub: <https://github.com/biskecz/quant-market-data-analytics>
